The **unique creations** of Anna Colore Industriale have their origins as well in the Milanese culture of its founder from the **Academy of Fine Arts in Milan**, as in the air of Paris time.

The boutique, located since 2009 in the heart of the 11th century, is home to unique creations of **bespoke furniture**, inspired by the 50s and 60s.

For 2018, the new collection presents **concrete** parts, easy to live. They combine the strength and rigor of concrete with **round shapes** to fit into contemporary interiors.

Tables, desks, coffee tables, stools, bookcases ... Anna Colore Industriale creations cater to a large public of individuals or decorators.

Their particularly **affordable price** gives everyone the opportunity to choose a custom piece of furniture, an original creation, **made specifically** to meet their needs.

Exclusive furniture with colors, dimensions and finishes to choose from, a craftsman's work with **added artistic value**.

Price on estimate.
